

Maximize your Wireless Network!

Tired of those wireless dead-spots in your home? Frustrated with slow file transfers because of interference in your wireless network? Introducing AuraOne's revolutionary **AuraGrid Wireless Extension System**, designed to completely eliminate dead-spots and unwanted interferences in today's digital homes.

AuraOne's patent pending technology allows both CableTV/Internet and 802.11b/g wireless RF signals to be distributed over standard coaxial cables. The same cables that are already installed in most homes today. AuraGrid can also be deployed anywhere coaxial cables are installed such as hotels, apartments, and commercial buildings.

Rooms that are equipped with an **AuraGrid Room Antenna** can enjoy maximum wireless signal strength as well as data throughput without interrupting CableTV/Internet services.
